Going straight to the point, controls in this game aren't crappy. They're abysmal.

You can work them out by practicing with wasd keys, but really they're a complete mess..

Basically you have 15 different levels with '80s arcade-like graphics in which you are a green square and must work your way out by avoiding enemies running back and forth preset movement lines.

The bad thing is that wasd keys aren't for movement, but they're for the ice puzzles in Pok\u00e9mon (or Epic Battle Fantasy if you prefer): when you hit the directional key, you go.. you can't stop, and this makes everything or super difficult or super easy, depending on the level. You actually -could- stop by pressing space, but controls are so laggy and crappy that you will never stop in the right place.

On a further note, the game on my Italian Steam client\website has a translation which is the most horrible I ever saw - and they ask me why I play in English even if I don't like foreign languages..

The text goes "\u00c8 necessario gestire il verde cubo e raggiungere un altro verde checkpoint. Ma \u00e8 molto difficile, cos\u00ec come il giocatore interferiscono con lame rotanti e altri ostacoli rosso colore."

That translates as: "It is necessary to manage the cube green (sic) and reach an other (sic) checkpoint green. But it is very difficult, like the player (singular, sic) interact (plural, sic) with spinning blades (article is mandatory in Italian, sic) and other obstacles color red (sic)".

I want to meet the translator, he's my hero.

Anyways back to the game, it's a simple (not for the difficulty but for the fact it has only few short levels and you can only move from one point to another one) and standard arcade game; there are tons of arcade platformers out there that easily overcome this thing.

Get it only if you want the achievements, you'll find no fun at all. Soundtrack is horrible too.. + The visuals are decent.

+ Gameplay is challenging.

- The controls can be frustrating

- collision detection....

Yes, if you are into these kind of games you should try this *small* but decent game You might get frustrated because it misses a finishing tough.. Developer was very fast to respond to a forum post about a bug that the game launched with, and he put a patch to fix it about one hour later. The game itself was fast (40 mins), but enjoyable!. You get what you paid for, 1.5K achievements at minimum price. If you\u2019re an achievement hunter looking to increase the number of achievements on your profile showcase, then I highly recommend buying this. Else don\u2019t waste your money. This is not a game, it\u2019s just a way of distributing achievements.. I finished the game in 25 minutes. I tried to enjoy it as it was very easy but I just can't recommend this game. It's most likely unplayable for all the bugs and glitches. I tried to lower the graphic settings but that wouldn't stop the lasers from showing at certain levels. Might be worth buying for the 1500 Achievements though, and you'll get a average time of 20-60 minutes when completed all the levels.

There is a thin line between a hard and challenging game and a frustrating one; the problem with this game is the buggy yellow cube you control. Sometimes you have to restart the game and change the resolution + graphic quality so the game will run smoother and your cube will stop lagging. In the end I beat the game in 1 hour, except the last level. Fortunately you don't have to finish level 15, you get all achievements by finishing level 14.

I gave the developer a hint for a bug I had and he fixed it in 2 days. Nice support!. This game truly hurt my brain while playing it. The quality is just shocking, the time they put into this seems next to none and it just shockingly bad, the only good thing is the 1500 achievements and even with that it still didn't seem worth it. There is honestly not a lot I can say about this game because some of the things in this doesn't make any sense AT ALL. One example would be if you have the graphical quality on "Fastest" then the ball spikes move so fast it makes the game impossible, meaning you need to have it on "Fantastic". Also, there is no control page or anything to tell you what to use and it wasn't until level 9 or 10 I realised there is a button to stop your character from moving.

Controls:

WASD or Arrow keys to move

SPACE to stop (This is EXTREMELY USEFUL)

Pros:

Cheap

Lots of achievements

Cons:

Mind numbingly bad

Slow

The character stutters

Hard to control

A slight delay on when you change direction in game

I would rate this 2.3/10

. You get what you paid for, 1.5K achievements at minimum price. If you're an achievement hunter looking to increase the number of achievements on your profile showcase, then I highly recommend buying this. Else don't waste your money. This is not a game, it's just a way of distributing achievements.. Die Steuerung macht das Spiel so unfassbar schlecht. It's crap don't buy it.. Completed 01/11/2018.
